Dear Family, Your child is recognizing fractions found all around us and is learning that fractions are equal parts of a whole, of a set, or of a length. $\frac{1}{2}$ or any equivalent fraction except $\frac{1}{3}$ Reasoning component: Student explains how to use the model to represent the fraction, such as, "There are 3 rows, so $\frac{1}{3}$ is one row. There are 4 pieces in each row and 12 pieces in all, so $\frac{4}{12}$ would be equal to $\frac{1}{3}$." Note: A variety of explanations are valid, as long as it is clear that
