The Urban Naturalist is an intriguing book perfect for the observant citizen stroller. Keeping your eyes open in your natural surroundings is not only fun but enlightening. This informative, useful field guide reveals the amazing biodiversity within city and suburban landscapes, including trees, insects and other invertebrates, fish, amphibians, reptiles, birds, and mammals. "The Urban Naturalist" is a start at describing the Urban Biome and what organisms would be found in such a biome. In this way the Urban settings should all share some common species and Steven Garber does his best to identify some of these common species and discusses why they should do well in these settings and why the Norway Rat and Black Rat are found in our cities and not the native north american species.
